

Enterprise Cloud Infrastructure & IT Software Tender

Tender Ref: IT-2026-CLOUD-109 | Category: Information Technology

1. Project Scope

Invitation for proposals to migrate legacy on-premises application servers to a secure multi-region cloud infrastructure using Kubernetes container orchestration, PostgreSQL database clusters, and automated CI/CD deployment pipelines.

2. Service Level Agreement (SLA)

The vendor must guarantee 99.99% uptime for Web API endpoints, 24/7 technical helpdesk support, end-to-end TLS encryption, SOC2 Type II compliance, and automated daily offsite backup replication.

3. Vendor Qualifications

Bidders must possess certified cloud solution architect credentials, demonstrated experience with React and Node.js enterprise microservices, and minimum 5 years of commercial IT consulting history.
